

What is pink cocaine?

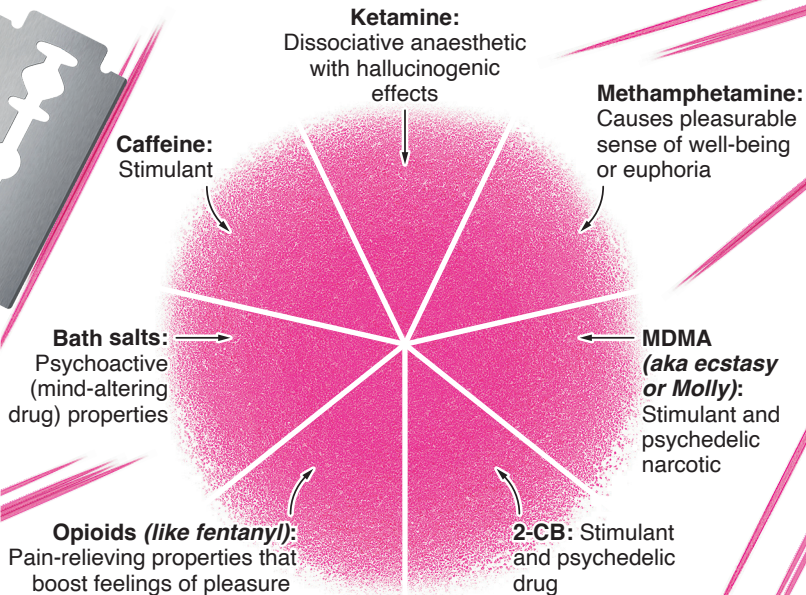

Former *One Direction* band member *Liam Payne* had a cocktail of drugs called *pink cocaine* in his body when he fell from a hotel balcony in Argentina and died

Pink cocaine (also known as Tusi): Powdered mixture of drugs, coloured pink with food colouring or dye, that usually does not include cocaine – cheap and popular

Pleasurable effects: Users experience sense of openness and euphoria. **Adverse effects:** Hallucinations, anxiety, increased heart rate, nausea, vomiting and occasionally seizures, abnormal heart rhythms and coma

No set composition or ratio of ingredients but typically:

May be contaminated with drugs beyond those mentioned, meaning unanticipated effects can occur
