

Apple to unveil striking iPhone redesigns

Apple is just a few weeks away from its annual iPhone launch event, when it's expected to reveal the first of three major design overhauls for the device – the ultra-slim *iPhone Air*

– 2025 –

Camera:
Only
one

5.5mm
thick

iPhone Air

Too thin to house **Face ID** to unlock it – instead uses fingerprint scanner side button. Expect shorter battery life than its *iPhone 17* siblings too

– 2026 –

*iPhone Fold**

Will fold open like book, similar to Samsung's *Galaxy Z Fold7*, but features innovative method to erase centre crease, so it looks like single piece of glass

– 2027 –

*iPhone Glass**

Apple will celebrate iPhone's **20th birthday** by launching handset with wraparound display that curves in all directions, so there are no bezels at all
