

Foreign parts found in Russian weapons

Ukrainian President Volodymyr Zelensky has alleged that drones and missiles fired by Russia against his country are filled with thousands of foreign-made components

*Zelensky (left) claims Russia's Oct 5 strike on Ukraine deployed **549** weapon systems containing **102,785** foreign-made components*

Shahed / Geran ▶
Attack drone

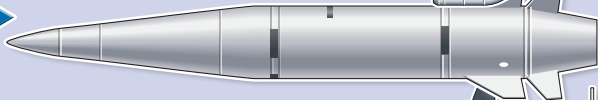

9M728 Iskander: Ground-launched cruise missile

Kh-101 ▶
Air-launched
cruise missile

Kh-47M2 Kinzhal ▶
Air-launched
hypersonic missile

3M-14 Kalibr ▶
Land attack cruise missile

COUNTRIES ACCUSED OF SUPPLYING COMPONENTS

U.S.: Converters for *Kh-101* and *Shahed / Geran*-type drones, sensors used in drones and *Kinzhal* missiles, analogue-to-digital converters and microelectronics

Netherlands: Processors for missile technology

Switzerland: Microcontrollers for drones

South Korea: Servomotors and bearings

UK: Microcomputers for drone flight control

China and Taiwan

Responsible for largest volume of microelectronics – at least 50 different units in each *Shahed / Geran*-type drone

Japan: Optoisolators for cruise missiles

Germany: Switching connectors
