

Europe grapples with drone disruption

Anti-drone troops from the UK, France and Germany are providing assistance to Belgium after a spate of airspace incursions that some officials have blamed on Russia

REPORTED AIRSPACE INCURSIONS (Sep 9-Nov 9, 2025)

Oct 31-Nov 9, Belgium

Multiple sites affected, including temporary closures at Brussels and Liège airports and disruption at Kleine-Brogel airbase

DRONE DEFENCE CAPABILITIES

■ **Troops:** Specialist teams from France and Germany operating in Belgium, alongside around 20 RAF personnel from UK

■ **Equipment:** Systems such as RAF's *Orcus* (pictured) can jam electronic signals used by drones. Specialist teams also have drones that eject nets to catch and take down other drones, as well as interceptors that ram hostile drones
