North Korea tests ballistic missiles

North Korea has successfully tested five high-precision ballistic missiles armed with cluster bombs and fragmentation mines amid reports that the U.S. is restricting intelligence sharing with South Korea

KIM JONG-UN'S MISSILE PROGRAMME

Ballistic missiles tested by North Korean leader

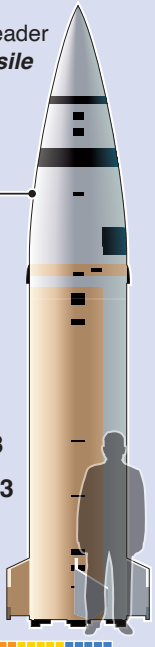

Hwasong-11D short-range ballistic missile

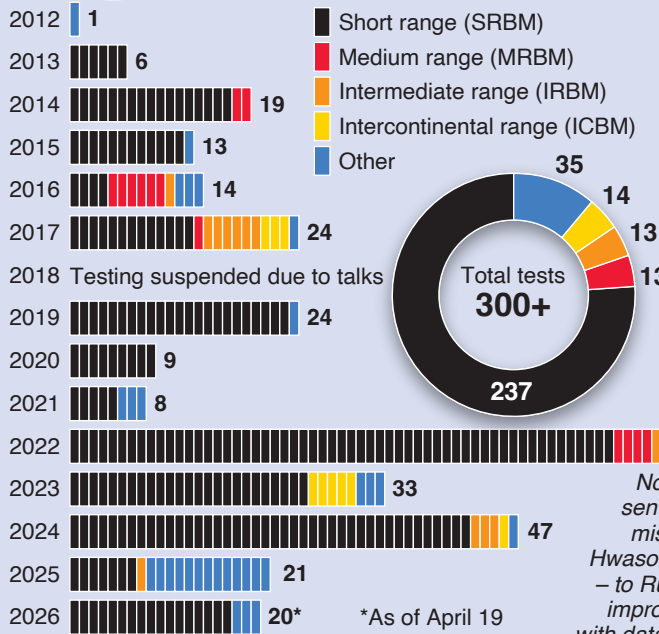

Solid propellant, truck-launched

Range: *Estimated 300-400km*

Warhead: *500-700kg*

Guidance: *GPS and inertial navigation systems*

North Korea had sent 150+ ballistic missiles – mainly Hwasong-11 variants – to Russia by 2025, improving accuracy with data from Ukraine
