Apple's next big thing(s)

When *John Ternus* succeeds *Tim Cook* as boss of Apple, he'll inherit a formidable lineup of 10 products in development, including a highly anticipated iPhone

IPHONE FOLD
Due: **Sep 2026**

Crease: To be less visible than those of rival foldables

John Ternus, Apple's CEO-in-waiting

Device will be complex, innovative and expensive *($2,000-$2,500)* state-of-the-art machine – development of which has been overseen by Ternus, making him ideally suited to launch it soon after he takes over from Cook

SMART HOME HUB
Siri-powered screen and loudspeaker combination, can look after home's smart devices, play music and make video calls

TABLETOP ROBOT
Souped-up ***Smart Home Hub***, with robotic arm that lets screen track user *(whom it can recognise)* around room

SECURITY DEVICES
Apple wants to enter home security market and compete with ***Nest*** and ***Ring*** by making indoor cameras, video doorbells, etc.

SMART GLASSES

Can take photos/videos, provide audio language translations and use AI to identify landmarks, etc.

AI AIRPODS
Infrared cameras will offer enhanced environmental awareness, gesture controls and tighter AI integration

AI PENDANT
Worn as necklace or pin and housing camera system, it acts as partner to ***iPhone***, using AI to understand user's surroundings

TOUCH-SCREEN MAC
Revamped ***MacBook Pro*** with tactile display for scrolling, zooming, and specialised menus

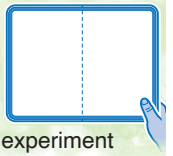

AR GLASSES

Useful information, like maps or fitness metrics, overlay user's vision – could replace ***iPhone***

FOLDING IPAD
Pet project of Ternus, **20-inch** folding tablet could end up as failed experiment
