China seeks powerful U.S. AI chips

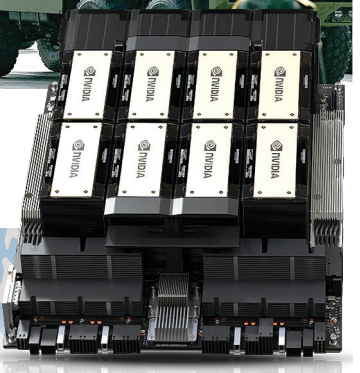

AI microchips, supposedly protected from being used for military applications since President Trump allowed their export to China, are being sought by universities that support the country's defence industry

UNIVERSITIES TRYING TO ACQUIRE ADVANCED NVIDIA AI PROCESSORS

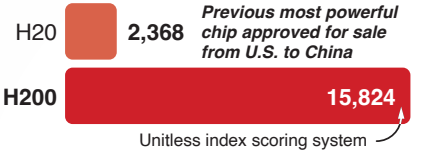

Using variety of ways, including trying to buy them through third-party brokers or seeking ways to rent chips' power from afar

Nvidia's H200 GPU *(above)* is extremely powerful processor
