Climate hazards threaten 1.1 billion children

Nearly half of the world's children – around 1.1 billion – are exposed to at least three overlapping climate hazards, while almost every child faces at least one, according to a new UNICEF report

CHILDREN'S EXPOSURE TO MULTIPLE CLIMATE HAZARDS

Children are more vulnerable to climate change than adults because their bodies are more sensitive

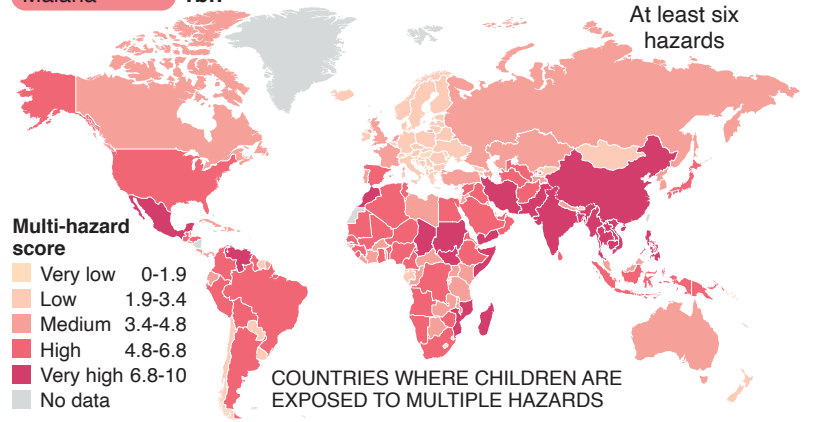

EXPOSED TO CLIMATE HAZARDS

- Droughts **1.8bn**
- Heatwaves **1.5bn**
- Extreme heat **1.2bn**
- **662m** Tropical storms
- **337m** Riverine floods
- **206m** Severe fires
- **123m** Sand storms
- **33m** Coastal floods

CLIMATE-SENSITIVE HAZARDS

- Pollution **2.3bn**
- Malaria **1bn**
