World's longest flight set to take off

Qantas Airways plans to launch the world's longest non-stop flights from Sydney to London next year, with a modified Airbus jet capable of flying for up to 22 hours with 238 passengers on board

A350-1000ULR (Ultra Long Range)

Engines: Two Rolls-Royce Trent XWB-97

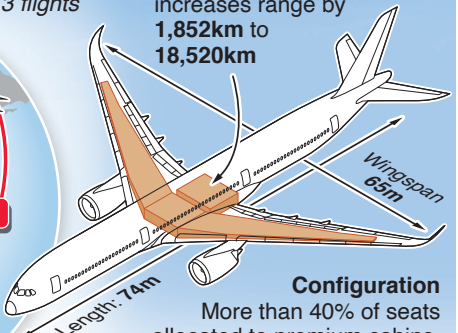

Rear Centre Tank (RCT)
Extra **20,000**-litre fuel tank integrated into aft fuselage increases range by **1,852km** to **18,520km**

PLANNED ROUTES

London
3 flights

New York
3 flights

Configuration
More than 40% of seats allocated to premium cabins, including six first-class suites

*Timings approximate

— Current longest non-stop commercial flight

Comfort
Features designed to reduce strain of ultra-long flights include "Wellbeing Zone" for stretching, specially timed meals, and dynamic lighting that mimics sunrise and sunset to help reduce jet lag

First-class suite
