Chinese AI taking over America

A Chinese startup has launched the world's largest publicly available AI model (dispelling ideas they lag far behind the U.S.), as data attributes almost 60% of U.S. firms' AI usage to cheaper services from China

WEEKLY TOKEN SHARE OF CHINESE AI MODELS USED BY U.S. FIRMS ON *OPENROUTER* *(%)

OpenRouter:** Programming interface that allows developers to easily access over 500 ***Large Language Models *(LLMs)*, including those from likes of ***OpenAI***, ***Anthropic*** and ***Google***, as well as LLMs from countries outside U.S.

Token:** Before AI can read your text input, it chops it up into smaller pieces – process called ***tokenization. Each unit of data (token) that LLM processes is roughly equal to one "syllable" of a word

WEEKLY TOKEN SHARE OF MAJOR CHINESE AI MODELS USED BY U.S. FIRMS ON OPENROUTER *(%)

Kimi K3** *(from AI startup **Moonshot**)* just unveiled – claims to deliver performance approaching that of Anthropic's ***Fable, once deemed too dangerous for public use
