Ukraine strikes Crimea's energy grid

A Ukrainian drone campaign against Crimea's power grid has left hundreds of thousands of people in the Russia-held territory without electricity for days at a time

UKRAINIAN STRIKES IN OR NEAR CRIMEA*
(April 13-July 13, 2026)

Power stations
Other targets
Refineries and oil facilities

*Within 75km of Crimea. Strikes grouped in 5km^2 bins separately for each category

*Battering Crimea's power grid was meant to raise pressure on the Kremlin to negotiate a peace deal to the war in Ukraine, but Russian President **Vladimir Putin** has not publicly acknowledged the blackouts*
