

U.S. population

America's population is set to pass 300 million in October and it's likely the milestone baby – or immigrant – will be Hispanic.

A baby is born in the U.S. every eight seconds, someone dies every 13 seconds, and someone migrates to the country every 30 seconds

Oct 2006, population: **300 million**

Nov 1967, population: **200 million**
